I need some clarification on what dollar amount the cost of the permit is going to be calculated on. Joanna called today and the permit was going to be \$6000 (not the exact amount) which is based on the total cost of the project. I thought it was determined that the cost of the permit was going to be calculated on the dollar amount of the work being done in the public right of way which is \$3000.

We are scheduled to plug the public manhole tomorrow. Please let me know asap how the cost is going to be determined and what the amount will be.

Hi Joanna

I submitted a application for a permit a couple of weeks ago. Here is some additional information you needed to complete the permitting process.

The cost will be approximately \$3,000 to plug the public manhole. This includes grout or blow-up plugs and shoring to facilitate the cleaning of the pipe systems, then CDF backfill the manhole.

I will be coming to the permitting office this morning.

Thanks

Mike Pearia
